HARD SKILLS

MACHINE LEARNING

PyTorch, NumPy, Pandas, Scikit-Learn,
Hugging Face Transformers, Deep
Learning, NLP, LLM Inference, Knowledge
Distillation, Model Evaluation,
Reinforcement Learning

PROGRAMMING LANGUAGES & TOOLS

Python, C/C++, Rust, Solidity, Git, GitHub

WEB DEVELOPMENT

HTML, CSS, JavaScript, React JS, Tailwind
CSS, Node.js, Express.js, API Handling,
Web Sockets, SupaBase, MongoDB,
PostgreSQL

WEB3

Blockchain Basics, Solidity, Foundry,
Uniswap V1/V2/V3/V4, Walrus,
RootStock, PythNetworks, Hardhat

COURSEWORK

Linear Algebra, Probability & Statistics,
Data Structures & Algorithms, Machine
Learning, Deep Learning, Signals &
Systems, Digital Signal Processing

WRITING

TECHNICAL ARTICLES | Medium

- Wrote 30+ articles on Machine Learning, Web3 & DeFi.
- 5K+ cumulative views.

RESEARCH & PUBLICATIONS

ACL ARR 2026 SUBMISSION | Co-AUTHOR

DistillBeam: Multi-Trajectory Knowledge Distillation for Efficient Speculative Decoding

- Conducted evaluation and analysis of experimental results for multi-trajectory knowledge distillation.
- Performed multilingual benchmarking across 20 languages and validated efficiency metrics including acceptance rate and block efficiency.
- Achieved 35–65% inference speedup over autoregressive decoding.
- OpenReview: [Paper Link](#)

WORK EXPERIENCE

GOOGLE SUMMER OF CODE (GSOC) 2026 MENTOR | OWASP FOUNDATION

- Mentoring contributors under the OWASP Foundation as part of the Google Summer of Code 2026 program.

SUMMER RESEARCH INTERN | LNMIIT JAIPUR, INDIA Jun 2025

- Researched impermanent loss and Loss vs Rebalancing (LVR) in Uniswap v4. Designed simulation frameworks, analyzed protocol-level risk, and evaluated mitigation strategies using quantitative experimentation and data-driven analysis.

PROJECTS

- **Vishwamitra (Meta × PyTorch RL Hackathon)** – Built a multi-agent reinforcement learning environment for educational policy optimization using Meta OpenEnv. Designed a swarm-of-swarms LLM orchestration framework, distilled deliberative policies into a 1B-parameter student model, and achieved a +24 reward-unit improvement over the baseline policy.
- **GammaHedge** – Autonomous Uniswap v4 LP guardian that mitigates impermanent loss through real-time delta-neutral hedging and cross-chain AVS-based risk management, enabling capital-efficient and protected liquidity provision.
- **VigilBot** – Full-stack blockchain platform that detects, classifies, and monitors trading bots on decentralized exchanges in real time using smart contracts, oracle price feeds, and behavioral analytics.

ACHIEVEMENTS

- Co-author, ACL ARR 2026 Submission on Efficient LLM Inference
- Google Summer of Code (GSoC) 2026 Mentor, OWASP Foundation
- Finalist, Meta × Scaler Reinforcement Learning Hackathon 2026; invited to on-site finals in Bengaluru
- Won \$1500 – ETH Online 2025 (1st Place, Pyth Network Track)
- Won \$600 – LNMHacks 8.0 (1st Place, x402 Track)
- 200K+ impressions across X and LinkedIn
